

AT&T **fiber**

Building you a hyper-fast and reliable internet

Over the next several weeks, AT&T crews will be working in your neighborhood to install a 100% fiber network with AT&T Fiber.[®] This work will sometimes require access to our network that is located in easements or public right-of-ways. Work could involve tree trimming, digging, cable or terminal work. We will always do our best to minimize any disruptions to you. Once the work is complete, we will remedy any disorder caused to your landscape, if necessary.

AT&T fiber

Coming to your street

Built on a reliable 100% fiber network.
Don't settle for less.

Uploads as fast as downloads because it's just as important to send, share, game, and video chat as it is to download and stream. Cable technology doesn't offer that!

Hyper-gig speeds to support devices of today and tomorrow.

Consistently fast, even during peak usage times. Based on wired connection to gateway.

Get notified for AT&T Business Fiber® too.

Dear HOA members,

This email is to inform you and your residents that AT&T Fiber is coming to your neighborhood very soon. Silas White Construction has been contracted by AT&T to start the placing the new fiber. Your residents will see signs at the neighborhood entrances, as well as receiving door hangers on individual residences. We will be meeting onsite with the AT&T Construction Coordinator & the city inspector regularly to discuss the project also.

Attached is a picture of the door hangers we will be placing on every home in the work area. The door hanger looks like an advertisement/solicitation, but it is not. These door hangers are a notification with our contact information. After the work is complete and final restoration is complete, each home will receive another handout explaining the lawn maintenance of new sod and how to water the new sod. I believe that watering by hand is acceptable in your area, but the residents will need to verify that with the city. If anyone is interested in upgrading their service, they can use the QR code on the door hanger or contact AT&T at the website below.

Your residents will see locate flags in the front and/or the back of their yards or in alleys to identify existing utilities. These flags will be in the right-of-way and should NOT be removed. We will be digging small holes to locate these utilities. All these holes will be fenced with orange fencing at the end of each day as we are working in the area.

Our goal is to place this fiber with as little disturbance as possible. However, please know there will be a necessary amount of digging to accomplish this project. If there are any issues, they will be corrected as soon as possible.

Information on AT&T Fiber can be found on the following website:

www.att.com/internet/fiber-is-coming

Sam Dominguez & Mike Olivarez will be your contact throughout the project for questions or concerns. Email address and cell phone information are below:

Sam Dominguez

sam@silas-white.com

[\(469\) 863-3019](tel:(469)863-3019)

Mike Olivarez

olivarez@silas-white.com

[\(469\) 915-2458](tel:(469)915-2458)

All residents may contact Sam Dominguez or Mike Olivarez at this time.

Please forward this information to your residents and/or post on your social media sites if available. I am available to discuss it at the number/email address below. Thank you for your assistance in getting this information out to your members.

Thank you,
Sam Dominguez
